PROFESSIONAL SUMMARY

Software engineer with over 3 years of experience building scalable distributed systems and back-end services across diverse technologies. Specialist in designing scalable system architectures and building reliable back-end services. Proven ability to modernize and maintain legacy codebases, quick to adapt to new environments and frameworks, and lead technical sprints in high growth engineering teams.

PROFESSIONAL EXPERIENCE

DIJIMENTAL| SERDIVAN, TURKEY **Jun 2024 – Sep 2025**
Software Engineer I

- Led a team of 3 engineers, overseeing project planning, development, and delivery across 5+ full-stack projects.
- Designed and implemented tailored infrastructure for client projects with Nginx, Caddy, Docker, AWS, Azure, and Cloudflare based on their needs, budget, and existing environments, Replaced disorganized legacy setups with streamlined, maintainable deployment systems.
- Built and maintained custom software solutions using Remix, NestJS, Go, Flutter, and PHP across 5+ shipped client projects.
- Consulted with clients' IT departments on architecting high performance distributed systems, improving site speed and contributing to higher Google search rankings.
- Reviewed pull requests and mentored interns, raising code quality and consistency across the team.

DIJIMENTAL| SERDIVAN, TURKEY **Jun 2023– May 2024**
Software Engineering Intern

- Built full stack projects using PHP, and Codeigniter 4, including web scraping tools to extract and process data.
- Designed and refined system architectures for multiple projects.
- Helped plan and run client meetings, including preparing and delivering presentations.

EDUCATION

POLITECNICO DI TORINO| TORINO, IT **2028**
Bachelor of Science in Computer Engineering

TECHNICAL SKILLS & ADDITIONAL

DevOps & Infrastructure: AWS (EC2, S3, Lambda, RDS), Docker, Nginx, Caddy, Cloudflare Workers, VPS & Cloud Deployment, CI/CD (GitHub Actions)

Data & Backend: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Supabase, REST/GraphQL APIs

Frameworks: React Router, NestJS, Go Fiber, Hono, Express, Flutter
